

# Medical Detection Dogs

Registered Charity England & Wales: No.1124533  
and Scotland: No. SC044434

The future of disease diagnosis could be held in the paws of man's best friend.

The charity Medical Detection Dogs trains dogs to save lives using their amazing sense of smell.

Bio Detection Dogs are trained to detect even the tiniest smells associated with diseases like cancers, Parkinson's, malaria and bacterial infections in the training room.

And recently, a team of dogs have been trained as a first line of defence against COVID-19 in public spaces.

Medical Alert Assistance Dogs support people with complex health conditions such as Type 1 diabetes, PoTS and seizures when they're in danger of having a potentially life-threatening medical event by giving them a 5-10 minute warning so they can get safe, take the necessary action and prevent hospital admission.

With the help of your vehicles, we could help raise awareness of the power of a dog's nose while at the same time giving passers by the most attractive face of the back of a bus they have ever seen!
